Installation:

To set up the project locally, follow these steps:

1. **Clone the repository:**

```
git clone https://github.com/yourusername/virtual-tours-travels.git
```

2. **Navigate to the project directory:**

```
cd virtual-tours-travels
```

3. **Install dependencies:**

```
npm install
```

4. **Set up environment variables:**

Create a `.env` file in the root directory and add your variables (e.g., database URI, API keys).

5. **Run the application:**

```
npm start
```

6. **Step to setup Strapi:**

```
yarn develop
```

7. **Command to start nextjs:**

```
npm run dev
```
